Subject: Microsoft Settlement

The whole case was mainly initiated by some companies can not effectively compete in market. Every actions Microsoft is accused of, such as give away products, bundle products, discount for volume vendors, are common practice of IT industry. All other businesses, including those joined in the case in suing MS(Netscape, Sun, Oracle, AOL), have taken those actions, the only difference is they could not do it better.

It is time to close this case, let government get out of the marketplace, and let consumers to vote with their own money. In long run, if MS is guilty, the marketplace will punish it.
